FRX
FULL BODY HARNESS

Ref. 3200

TEAM RESCUE, TOWERS/INDUSTRY

Full body harness manufactured with para-aramid webbing and fabric for high resistance to heat, fire and cutting (working temperature up to 350°C, melting temperature > 450°C).

The innovative construction is designed to be comfortable and to make it very easy to put on and take off even while sitting thanks to the ventral part that is completely openable using a Triad 3Lock carabiner and the positioning of the automatic buckles on the inner part of the leg loops.

5 color coded attachment points: 1 ventral for suspension, 2 side for positioning and restraint, 1 sternal and 1 dorsal for fall arrest. Equipped with loops for fastening the bag of the Druid Pro Fire descender kit, two gear loops, and two slots for the Kilo gear carabiner. Velcro attachment points for fixing logo or name patches on both legs.
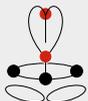

Equipped with NFC TRACK tag for digital identification.

3 sizes.

NFC Track | G.T.S.

C.A.M.P. presents a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID** (High Frequency Radio Frequency Identification) communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

– G.T.S.– GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app (campgts.it).

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.
